

LOCOCLEAN™

LOCOCLEAN 100 is a **CONCENTRATE** and is often ordered where lower levels of dilution are required. This product is often used as is, for heavier uses like parts washing, pre-spotting, or as a vehicle engine degreaser. It is biodegradable and is not DOT regulated.

PRODUCT SPECIFICATIONS

Appearance	Clear or purple liquid
Odor	Mild soap
Flash Point	None
Freezing Point	28°F
Specific Gravity	1.020-1.028
pH	10.0-10.5
Stability	Stable

Product Code:	C3-100
Quantity options:	5 gal. Pail, 55 gal. Drum, 275 gal. Tote, 5,000 gal. Bulk
Quantity options (outside US):	19 L Pail, 205 L Drum, 1000 L Tote, Bulk tank truck (Canada only)
Dye:	Yes
Dye Options:	Purple or custom dye (by customer request)

LOCOCLEAN 300 is a **SUPER-CONCENTRATED** product developed for high-speed, high capacity automatic washing facilities where the dwell time is limited and freeze protection is required. It can also be used in regular washing facilities, car/bus washes and other uses outlined in the bulletin. It is biodegradable and is not DOT regulated.

LOCOCLEAN 300 has all the qualities of the regular LOCOCLEAN 100 concentrate. LOCOCLEAN 300 can be diluted with water to reach the normal LOCOCLEAN 100 strength, which is comparable to other full-strength, heavy-duty cleaners on the market. The regular concentrate is then diluted based on end-use (see next page). To dilute the LOCOCLEAN 300 simply add water in the amount of 2 times the volume of LOCOCLEAN 300 you are diluting to reach the full-strength LOCOCLEAN concentration (2 parts water : 1 part C3-300).
